

Trend Micro™

Worry-Free™ Business Security Services

Your computers are protected wherever they're connected.

Enjoy true peace of mind

Your business needs security that protects your computers and the information on them whether your employees are connecting in the office, at home, or on the road. But if security is not your area of expertise, why make it tough on yourself? You need a solution that's designed specifically for your size of business: one that's a snap to install, effortless to configure, and gives you worry-free protection. That's what we call Trend Micro™ Worry-Free™ Business Security Services: you get peace of mind so you can focus on what you do best—taking care of your business.

Choose security designed for small offices

Worry-Free Business Security Services provide customers with protection for computers that are in the office, at home, or on the road. It's security delivered as a service that's designed to be always connected so your business is always protected.

It's simple to install and manage. When you subscribe to Worry-Free Business Security Services, you don't have to worry about viruses, threats, and dangerous websites. You don't have to maintain a server or worry about who'll manage it. You don't need to concern yourself with updates or lost data. It's all automatically managed for you and the easy-to-use web-based console let's you manage and monitor your computers from just about anywhere so you can feel confident that your information is safe.

Worry-Free Business Security Services is powered by Trend Micro™ Smart Protection Network™. Like a global neighborhood watch, it detects the latest threats wherever they emerge to ensure your business is protected all of the time.

Experience security that's as easy as 1, 2, 3

Trying to protect multiple computers with a mix of security products? If your security isn't continuously updated, you may be vulnerable to infections that can disable your machines or to hackers who can steal from your business. Do you have an on-premise security server? If so, do you have the time and resources it takes to configure and maintain your own server, track policy updates, and stay current on the latest web threats? There's a simpler choice for security: it's as easy as (1) register, (2) login, and (3) connect.

KEY BENEFITS

- Monitors, updates, and protects all of your computers automatically
- Stops threats before they reach your business
- Protects computers whether in the office or on the road
- Blocks employee access to unwanted websites
- Secures connections with Wi-Fi monitoring
- Prevents infections from USB storage devices
- Locks down confidential and financial data
- Easy to set-up: Just register, login, and connect

“Worry-Free Business Security Services has done a great job of catching the latest threats. Once it's installed, it just works. The combination of advanced security features and reporting capabilities give us—and our customers—peace of mind.”

Per Moeller-Olsen
Founder, Computer Plus One

BENEFITS FOR SMALL OFFICES	
Protects your valuable business data and files from theft or tampering	You can safeguard your data from threats. Also, you can use a unique feature to specifically lock-down Intuit Quickbooks® files and folders.
Protects you from threats that come from USB devices or Wi-Fi connections	Your workforce is protected from viruses carried on USB devices, and from hackers that attack when your computers log on via Wi-Fi.
Provides global neighborhood watch via Trend Micro Smart Protection Network	More than 70 million threat sensors around the world identify new web threats constantly to block dangerous web sites, spam, and files.
Easy to set up on desktop computers, laptops and servers	Just register, login, connect to protect—and you're secured. Register online and receive instant access to the service. Then, simply connect each machine.
Lets you or your trusted IT partner easily manage and monitor security	Centrally manage your desktops, laptops, and servers from anywhere. Get quick overviews and alerts to identify high-risk areas and schedule reports.
Constantly updated for the latest threat prevention	The Smart Protect Network™, a firewall, and advanced behavior-based protection ensure your computers are always protected.
Streamlined security processes won't slow your computers down	The service connects to our Smart Protection Network and processing occurs in our datacenters so antivirus defense won't slow down your machines.
Lets you restrict access to the web to improve productivity	Category-based URL filtering allows you to ensure only safe and productive sites are visited by employees at times you deem appropriate.
Allows you to protect your investment	Configurable access and password protected client uninstall ensure employees can't tamper with protection levels.
